SCHOOL IS COOL!

*Tutoring to boost
young pupil's motivation*

Collège Jean XXIII

Liceo F. De André

IES Alfredo Kraus

Batsányi János
Gimnázium és Kollégium

OBJECTIVES:

To tackle young pupils' difficulties within the school and prevent school drop-out by implementing a tutoring program including the oldest students.

- Develop, test, evaluate and implement a school tutoring program.
- Develop the self-confidence of young pupils.
- Prevent and reduce school drop-out which links the objectives of the project to 1 of the priority of the Erasmus+ program for the school sector.
- Develop the transversal skills of the oldest pupils.
- Reinforce cross-age cooperation.
- Exchange practices and experience with foreign partners.
- Reinforce the capacity of the school staff to manage a transnational project.
- Reinforce the links within the school community by compartmentalising the different school years.

RESULTS:

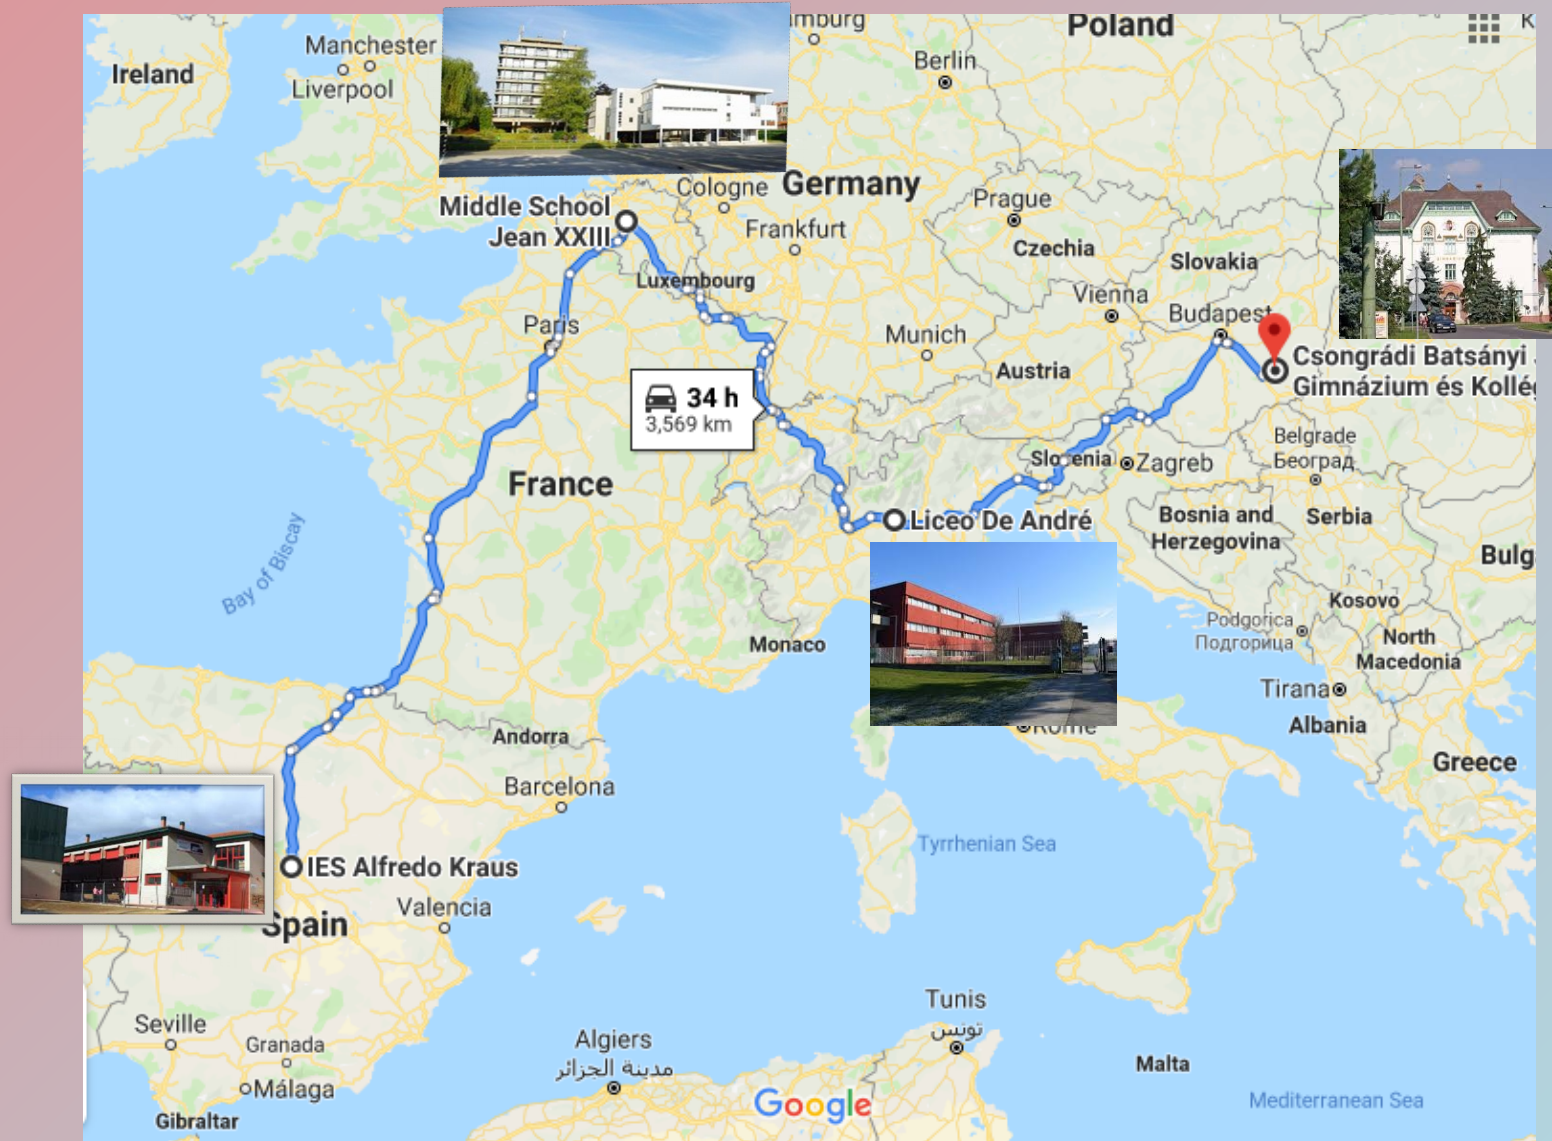

The **implementation of a sustainable tutoring program within our schools** by developing the following specific results:

- The creation of a toolkit with appropriate documents (including framework document, framework training for tutors, multilateral charter, follow-up documentation) to easily implement the tutoring program in our schools and in other schools interested.
- Creation of 10 groups of tutoring within each school during the 1st project's year: around 20 tutees and 10 tutors in each school.
- Creation of 20 groups of tutoring within each school during the 2d project's year: around 40 tutees and 20 tutors in each school.
- The impact of the activities and of the whole project on the participants (tutors, tutees, teachers, educators and school communities) will be multiple. Motivation among pupils, better knowledge of each other's difficulties and increasing of a good school atmosphere will be the main results of our project. By working actively on the project, participating students will also develop cross-cultural skills and understand similarities and differences among European students.
